LASTING. BEAUTY.

Terrace surface. **terraZa** -Profile.

- > patented Click System
- > coarse and fine fluting
- > does not split
- > machines like wood
- > holds its shape and is more durable than wood
- > recyclable
- > skid-resistant in the wet
- > easy-clean
- > format: width 145 mm; lengths of 4 m, 5 m, 6 m
- > 5-year guarantee

terraZa was developed for the extreme rigours of external use, utilising our experience in handling wood materials and our expertise in shaping wood.

The experience and knowledge invested in our terrace profiles ensure that they hold their shape superbly and are especially weather-resistant. An added bonus is the Click System developed and patented by Werzalit. Effortless and easy to lay, our Click

System lets you style your terrace with joints that are either almost closed or visible and fully designed-in. The coarse and fine surface flutings open up even more personalised design options whilst providing a safe and slip-resistant surface.

terraZa is available in four natural-look colour combinations: sabbia, terracotta, topino and marrone.
